📍 1571 aguinaldo st. Purok6 Brgy. Sapangbato A.C Pampanga

PROFILE

I have been working independently and collaboratively on various projects that involve creating, maintaining, and enhancing web and mobile applications for clients across different industries and domains.

Some of the projects that I have contributed to include online tutoring platforms, transportation management systems, health information systems, fintech solutions, real estate portals, and HR management tools.

My technical skills cover a wide range of programming languages and frameworks, such as JavaScript, TypeScript, PHP, React.js, React Native, Vue.js, Next.js, Nuxt.js, Express.js, Nest.js, Core PHP, Laravel, Symfony, CodeIgniter.

Mobile side : react native and flutter .

I also have a solid foundation in database management, utilizing MySQL, PostgreSQL, MongoDB, SQLite, Redis, Amazon DynamoDB, MariaDB, InnoDB, Firebase, and more. Additionally, I have a strong background in software development and a passion for coding, which I have acquired through my education and experience.

I hold a Master of Computer Applications degree from the University of The Philippines Manila and I am currently pursuing a Master of Science degree in Computer Science at the Nueva Ecija University of Science And Technology.

My career journey has been driven by a commitment to continuous learning and a dedication to solving complex technical challenges. I am always eager to explore new opportunities in the world of software development and to leverage my expertise in creating Platform as a Service solutions.

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Contracted

11/2023 – present

Valletta,

Malta (Remote)

After my contract with Self-employed Ltd concluded in 2023, I worked for Contracted Ltd as a full-stack developer for a year and a half. In this role, I was responsible for Backend development, Mobile App Development and Devops. I worked on here, applying my expertise in C#, JavaScript/TypeScript, Azure, React Native, and cloud computing. This experience allowed me to collaborate with cross-functional teams, deliver scalable and reliable solutions, and continue enhancing my technical skills.

This multifaceted experience has provided me with a deep understanding of various technical aspects and the ability to adapt to different project requirements. I look forward to discussing how my skills and expertise can contribute to your team and projects

Full Stack Developer

Self-employed

09/2019 – 08/2023

Kuwait,

Kuwait(Remote)

After dedicating over two years to my Erasmus experience, I sought a work opportunity that would offer greater flexibility in terms of my schedule. This decision led me to join Self-employed Ltd, a company founded by one of my former university professors. The unique nature of this company allows individuals to work independently, essentially working for themselves while utilizing the company's license to engage in B2B contracts and manage their own tax and insurance responsibilities.

Over the past four years, I have operated independently in a wide range of domains, including healthcare, education, transportation, HR management platforms, real estate, and e-commerce. My contract durations have varied, ranging from three months to a full year, all conducted on a B2B basis. During this time, I have specialized and made significant progress in JavaScript/TypeScript and PHP, spanning various aspects such as frontend, backend, and mobile development.

On the frontend, I have extensively worked with technologies like React, Angular, Vue, React Native, Tailwind CSS, SCSS, Material-UI, and Styled Components. Meanwhile, my backend development experience encompasses Node.js, Express.js, Meteor, Nest.js, Laravel, Symfony, and CodeIgniter. I have also explored diverse architectural approaches, including monolithic, MVP, serverless, and microservices. Additionally, I have primarily leveraged cloud computing solutions such as AWS and GCP to support my projects.

This multifaceted experience has provided me with a deep understanding of various technical aspects and the ability to adapt to different project requirements. I look forward to discussing how my skills and expertise can contribute to your team and projects.

Full Stack Software Developer

Erasmus Student Network

09/2017 – 10/2019
Manila, Philippines

Following the successful launch of the product at Philippines Medical Center, I advanced in my career and accepted a position at Erasmus, a large network organization operating within the education sector. My role at Erasmus spanned multiple domains, encompassing UI/UX, backend development, and mobile app development.

At Erasmus, I was entrusted with collaborating on projects aimed at serving a diverse range of partners, which involved the creation of online tutoring platforms. My technical contributions included:

Frontend Development:

Utilizing a variety of frontend technologies such as React.js, Angular, Vue.js, Next.js, Nuxt.js, and React Native to design and develop user interfaces that met the organization's requirements.

Backend Development:

Employing backend frameworks like Express.js and Nest.js to architect robust server-side solutions that supported our online tutoring platforms.

PHP Development:

Leveraging PHP technologies, including Core PHP, Laravel, Symfony, and CodeIgniter, to facilitate the development of web applications and services.

This role allowed me to further diversify my technical skills and contribute to the creation of online educational platforms within the framework of Erasmus' extensive network.

Software Developer

Phillips Medical Center

02/2016 – 08/2017
Manolo Fortich,
Philippines

I commenced my tenure at Philippines Medical Center as an intern, having secured the position via a school reference. Upon joining, my responsibilities involved interfacing with internal software systems focused on the automation, production, and logistics of medicine and related products, as well as financial software and sales tools. My role primarily entailed contributing to the development of a comprehensive Customer Relationship Management (CRM) system featuring distinct roles.

As my internship progressed, I collaborated with local enterprises to construct a Platform as a Service (PAAS) solution targeting medicine pricing. The objective was to create an enterprise-grade product capable of providing real-time global pricing data for medicine products. To accomplish this, we integrated APIs from various countries, encompassing regions like the Middle East and Europe, to collect and disseminate both Plats and Stock indicators.

Regarding my technical contributions, I engaged in both front-end and back-end development. On the front end, I utilized technologies such as HTML, CSS, Bootstrap, and React. On the back end, my work centered around Node.js and Laravel for web and software development. Infrastructure support relied on AWS, with some involvement of GCP. Data storage and management were facilitated through MySQL and PostgreSQL databases.

EDUCATION

Master of Science / MS, Computer Science

Nueva Ecija University of Science And Technology

11/2021 – 07/2023
Cabanatuan City,
Philippines

Master of Science / MCA, Computer Software Engineering

University of The Philippines Manila

Moreover, I attended industry-led workshops and seminars to stay updated with the latest technology trends, enriching my technical expertise and preparing for a successful career in the field of computer science.

Skills: REST APIs · HTML · NoSQL · PHP · Android · SOLID Design Principles · Linux · Cross-functional Coordination · Google Cloud Platform (GCP) · Object Oriented Programming (OOP)

09/2019 – 07/2020
Manila, Metro Manila,
Philippines

Bachelor of Science

University of The Philippines Diliman

During university, I actively engaged in computer science-related extracurricular activities and projects, including coding competitions and hackathons as a member of the coding club.

Skills: REST APIs · HTML · PHP · Programming · Web Development · JavaScript · Python (Programming Language) · Linux · Object-Oriented Programming (OOP) · Databases

10/2016 – 07/2019
Quezon, Philippines

SKILLS

FRONTEND

HTML, CSS, BOOTSTRAP, REACT, VUE, NEXT, TAILWIND, STYLED COMPONENTS, STORYBOOK

MOBILE APP

DEVELOPMENT
